

Xpressi Central Issuance Software Solutions

By NBS Technologies

THE SCALABLE SMART CARD PERSONALIZATION SOLUTION FOR FINANCIAL SERVICES

NBS is a leading developer and provider of card personalization, EMV compliance/migration, and smart card manufacturing. When it comes to smart card solutions, NBS Technologies is a global expert. With nearly 40 years experience in the financial card space, we have gained a deep understanding of the Central Issuance market by performing countless installations and delivering comprehensive services.

Horizon Evolution HD

NBS Central Issuance Software solution provides a scalable and cost-effective personalization preparation process for both low volume and high volume card issuers. It supports a wide range of card personalization processes – including industry standard P3 – and allows you to utilize multiple brands of card personalization equipment, high performance HSMs, chip operating systems and card applications.

SIMPLIFY AND STREAMLINE YOUR CARD PERSONALIZATION PROCESS WITH NBS CENTRAL ISSUANCE SOFTWARE'S ADVANCED PRODUCTION PERFORMANCE FEATURES AND MANAGEMENT INFORMATION CONTROLS.

NO MATTER WHAT YOUR VOLUME REQUIREMENTS, NBS CENTRAL ISSUANCE SOFTWARE ENABLES YOU TO:

-  Leverage existing and next generation smart card technology – card personalization equipment, HSMs, chip operating systems and card applications – with minimal modifications
-  Generate both pilot and large volume card issuance without application customization
-  Gain cost-effective control of your card issuance process without compromising security
-  Scale to your needs – from one to many. NBS Central Issuance Software is fully configurable
-  Design and customize a complete issuing system using components that meet your specific requirements

NBS *Xpressi* CENTRAL ISSUANCE SOFTWARE – A MODULAR APPROACH TO CENTRAL CARD ISSUANCE ENVIRONMENTS.

Through its set of core modules, NBS Central Issuance Software provides a full spectrum of card issuance capabilities with advanced production performance and management information controls:

NBS *Xpressi* DATAPREP™

The DataPrep module leverages high performance HSMs to perform personalized, scalable data preparation functions for both low and very high volume card issuers. NBS Central Issuance Software supports P3 and other preparation processes.

NBS *Xpressi* KEYMASTER™

A universal key management application, KeyMaster is configurable to support both current and future smart card applications without the need for customization or additional investment. KeyMaster comprises built-in functionality to generate all financial certificates.

NBS *Xpressi* CARDISSUE™

Whether you require 100 or 1 million cards, the NBS Central Issuance CardIssue module makes card personalization simple and scalable. This card issuance product supports multiple brands of printer hardware and a wide range of chip operating systems.

NBS XPRESSI SOFTWARE - ADDITIONAL MODULES AVAILABLE

NBS X Software supports existing magstripe applications and provides EMV smart card issuance at branch level. Ideal for quickly issuing replacement or new financial transaction cards, **Xpressi** offers a secure and flexible approach to branch workflow and central operations integration.
