VISION mission

VISUAL IDENTIFICATION:

It is important for businesses to have user-friendly ID solutions to provide badges for everyone within the organizations and the visitors. eTOP's visual identification solution provides the ability to combine access, security and identification in one card. eTOP offers superior service, quality and excellence by offering competitive price on all branded ID card printers and plastic card printer supplies for personal or business use. Find the right embossers, ID printers, printing ribbons, card printers, the newest photo technology for making identity badges, and choose from brands you trust.

SECURE IDENTIFICATION:

eTOP secure identification solutions increases security, enhances integrity and improves efficiency. A properly managed access control system helps your organization visually monitor access, prevent unwanted intrusion, know who is where and reduce losses. With biometric access control solutions, data capture systems and attendance monitoring software. eTOP helps you achieve all of the above.

SECURITY SYSTEMS:

In order to further strengthen the security measures, eTOP provides an extended security model that better secures the most exposed and weakest layers in the environment from any unauthorized entry. This is achieved by monitoring and controlling the entry of people on the premises with state-of- the-art CCTV systems and turnstiles. While CCTV systems help you capture and track activity on your premises, turnstiles enforce traffic patterns such as one-at-a-time, one-way or two-way. In addition turnstiles can restrict access based on authorized IDs and can even implement access based on tokens or barcoded tickets or similar. eTOP offers a wide range of turnstiles for you to choose from based on your needs.

DIGITAL SIGNATURE SOLUTIONS:

Using Signature Solutions to fill out electronic forms & sign e-contract will help your organization deliver superior customer service, increase operational efficiencies, mitigate compliance risks and improve bottom line results.

TOTAL INTEGRATION:

eTOP can seamlessly integrate the best-in-class security products and solutions, to function as a single cohesive system that meets the diverse security needs of our customers. From turnkey projects to customized solutions, we have the right expertise and exposure to build a scalable architecture and perform at optional levels.

UNMATCHED SUPPORT:

Our job doesn't end at the build stage, we ensure that your security systems are up and running all the time. We are backed by a well-trained partner network of professionals who offer quality support for maximum performance. Since many of the applications are developed in-house, you can count on us for unparalleled product and application support.

OUR PRESENCE:

eTOP has a global customer base spread over forty countries in North America, Middle East, South Asia, CIS Countries and Africa. We have registered offices in North America, Middle East, South Asia and well presented by a dealer network worldwide.

Leaving you free to what you do best, Managing your business!
